Managed Care Pharmacy
Residency Program

WHO ARE WE?

The Ohio State University Health Plan, Inc. administers medical, pharmacy, and wellness programs for university employees and their dependents. As an independent plan provider, OSU Health Plan has the ability to meet the unique needs of its clients and members by offering personalized health care, following a prevention and wellness model, and stretching the health care dollar through efficiency, cost effective services, strong negotiations, and even stronger partnerships.

PHARMACY BENEFIT SERVICES

The Pharmacy Benefit Services team is responsible for managing all aspects of pharmaceutical care in health plan design and delivery. This includes developing and implementing benefit designs, medication use evaluations, policies, communications, educational programs, quality improvement initiatives, and strategic plans. In addition, the Pharmacy Benefit Services team maintains the relationship with the Office of Human Resources and the Pharmacy Benefit Manager.

WHAT MAKES OUR PROGRAM UNIQUE?

As a result of our relationships with The Ohio State University Wexner Medical Center (OSUWMC) and The Ohio State University College of Pharmacy, managed care pharmacy residents have opportunities to participate in educational and networking activities in collaboration with ambulatory, community, and medical center pharmacy residents. This includes the potential to obtain a teaching certificate. Residents also have the unique opportunity to learn about the Rx Ohio Collaborative (RxOC), an expanding benefit initiative for self-insured Ohio-based employers enacted to save money on medication costs at both the institutional and consumer level and to create strategies focused on positively impacting member health.

PROGRAM SPECIFICS

Residents will actively participate in pharmacy-related functions in the following areas:

- **Pharmacy benefit design**
- **Formulary management**
- **Utilization management**
- **Drug information**
- **Medication therapy management**
- **Account management**
- **Vendor management**
- **Data analysis**
- **Project management**
- **Program implementation**
- **Policy development**
- **Outcomes evaluation**
- **Quality improvement**
- **Population health services**
- **Value-based contracting**
- **Teaching (both didactic and experiential)**

We highly value patient-centered, team-based care and as such our residents are immersed in collaborative care opportunities with other health care professionals both within and outside of the health plan. Each resident is also expected to identify, design, conduct, and present a managed care pharmacy-related residency project.

RESIDENT COMPENSATION

Residents can expect the following compensation:

- **Competitive Salary**
- **Available health benefits including medical, prescription, dental, and vision**
- **Retirement**
- **Life insurance**
- **Tuition assistance**
- **Paid vacation days, sick days, and professional development days**
- **10 paid university holidays**
- **Access to personal computer and other resources associated with job functions**
- **Travel expense budget for required meetings**

CANDIDATE REQUIREMENTS

Applicants must meet the following requirements:

- **Must be on track to complete a Doctor of Pharmacy degree from an ACPE-accredited college or university by the start of the residency program**
- **Must be eligible for licensure as a registered pharmacist in the state of Ohio at the start of the residency program**
- **Must participate in and adhere to the rules of the Resident Matching Program**

Note: Employment is contingent upon satisfying eligibility requirements (i.e. authorization to work in the United States, background check verification, drug testing, physical examination). Residents will be required to obtain licensure as a registered pharmacist in the state of Ohio by July 31, 2022 to continue employment.

Applicants should possess the following qualities:

- **Self-motivation**
- **Adaptability**
- **Reliability**
- **Creativity**
- **Organization**
- **Time management**
- **Comprehensive clinical knowledge and skill**
- **Superb analytical abilities**
- **Excellent communication abilities (both verbal and written)**
- **High-quality work ethic and desire to learn**
- **Ability to work independently and as a part of a team**
