

MyChart

Manage your health care anytime, anywhere.

The Ohio State University Wexner Medical Center's patient portal, MyChart, is an easy and safe online tool to manage your health care.

Manage appointments and find care now

- View existing appointments and schedule new appointments online
- Schedule a same-day appointment via video or telephone with Telehealth Immediate Care
- View Emergency Department wait times and let them know you're on the way

Communicate with your care team

- Message your doctor nonurgent questions
- Get medical advice through an e-Visit message

Securely access your medical information

- Receive a notification when your test results are available to view
- Request a medication refill and select your preferred pharmacy
- Pay your bill or set up a payment plan
- Manage health care proxies for your child or family members from your account

Get more with the Ohio State MyHealth mobile app

- Log in or create your MyChart account
- Find a new doctor and read patient reviews
- Get directions and real-time parking garage information
- Stay up to date on the latest health news

THE OHIO STATE UNIVERSITY WEXNER MEDICAL CENTER

Care for You and Your Newborn

THE OHIO STATE
UNIVERSITY
WEXNER MEDICAL CENTER

THE OHIO STATE UNIVERSITY
WEXNER MEDICAL CENTER

A Healthy Start

To give your newborn the healthiest start possible, choose a primary care doctor at The Ohio State University Wexner Medical Center. Our primary care physicians, nurses and other health care providers can help your child stay healthy with wellness checkups and vaccines. They can also make sure your child gets the right treatment for illnesses, injuries and common childhood conditions. In addition, we treat the entire family from birth through adulthood. Unlike pediatricians, our board certified Internal Medicine/Pediatrics and Family Medicine providers are experts in treating your entire family, from birth through adulthood. All care is provided by one health care team in one convenient location!

Caring for Mom and Baby

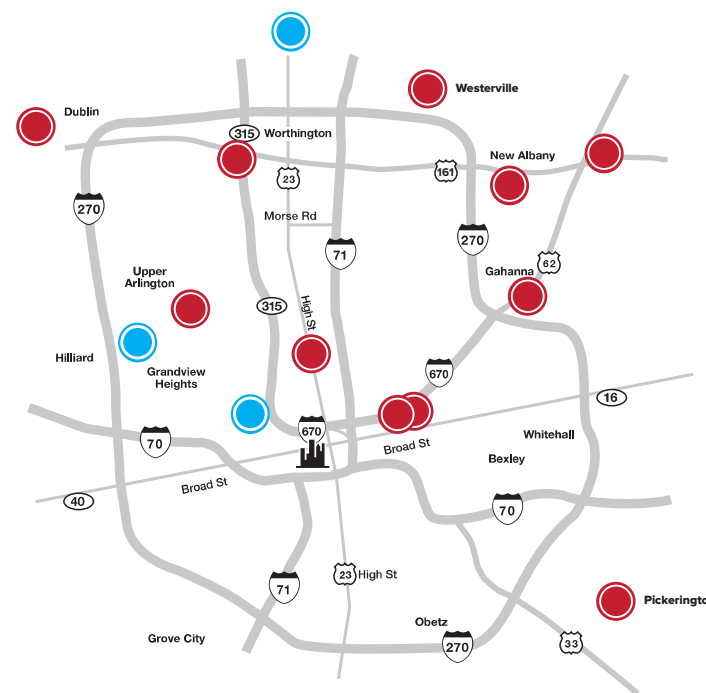

We know that a healthy baby requires a healthy mom. You're busy caring for your newborn, so we make it easy to schedule your routine primary care visits at the same time as your baby's. You'll feel confident knowing that we can provide the best support for your growing family. We specialize in caring for moms after delivery, especially those with high-risk conditions after high-risk pregnancies.

Having a newborn can be stressful. Breastfeeding can add extra stress. At Ohio State Primary Care, we have physicians who specialize in breastfeeding to help you meet your goals. If needed, our team can work together to evaluate mom and baby for any possible concerns, like low milk supply, or tongue or lip tie, which can hinder breastfeeding.

We know that it takes a village to raise a child and we want to be part of your support system. We look forward to meeting you!

To schedule a primary care appointment for you and your baby, call **614-293-5123**.
