

## **COVID-19 Exceptions for Provider Payments and Billing**

Number: PRPP1.1

Updated:

**03/01/2022**

This is an exceptions policy driven by the extraordinary demands of the COVID-19 pandemic. This policy is in full effect and supersedes all existing payment policies with which it may conflict as of 3/16/2020 and extends **now until 12/31/22**. **We will update our policy in advance of any changes taking place** **Please check back to this policy location often**. The document can be found at ([www.osuhealthplan.com](http://www.osuhealthplan.com)).

### **Key Payment Exceptions**

#### **COVID-19 Testing**

In response to the COVID-19 public health emergency, the US President has signed into effect the Families First Coronavirus Response Act effective. Under that act, medically necessary evaluation and testing for COVID-19 will be covered at 100% with no out-of-pocket costs. No Prior Authorization will be required, and there will be no network restrictions placed upon where members can be evaluated and tested. Services must be prescribed by your physician. Administrative requirements, such as for school, employment or travel, are excluded from coverage. If you have questions, please contact the OSU Health Plan at 614-292-4700.

#### **Expanded Telehealth Services (Now extended until 12 /31/22)**

The existing OSUHP Telehealth Policy PR1.0 can be found at ([www.osuhealthplan.com](http://www.osuhealthplan.com)). Exceptions to this policy are below.

Providers are accountable to understand and comply with the latest Privacy and Security guidance from the State and Federal government. It is OSUHP's desire to provide coverage for services and delivery methodologies as allowed by State and Federal regulatory bodies. OSUHP intends to process updates to this exceptions policy as new guidance and regulations are approved by the responsible government entities.

1. The following provider types will now be available for coverage in addition to those listed in the OSUHP Telemedicine Policy, when appropriately billed codes and modifiers are utilized:
  - Supervised practitioners and supervised trainees
  - Audiologists and their aides
  - Occupational therapists and their assistants
  - Physical therapists and their assistants
  - Speech/language pathologists and their aides
  - ABA therapists and ABA aide services

2. Interactive audio/video visits and audio only phone visits will be reimbursed at in-office payment schedules throughout the COVID state of emergency and/or until further notice. Providers are to follow current billing guidelines and use appropriate E&M codes, place of service codes, and telehealth modifiers.
3. For allowed services, initial sessions to establish care will no longer be required to be conducted face-to-face (in-person). Providers are encouraged to use sound clinical judgement when exercising this exception and choosing to establish care via telehealth methodologies. Telehealth visits to establish care may occur via audio/video and audio only when access to technology is limited.
4. Providers utilizing telehealth delivery do not have to possess licensure within the state in which the patient resides or receives service. Providers must still possess valid clinical licensure to practice.
5. Providers may utilize additional non-traditional technologies for telehealth services. We encourage providers to follow HIPAA guidelines to the greatest extent possible and act in the best interest of preserving member privacy when providing telehealth services. Please reference the latest Health and Human Services guidance here (<https://www.hhs.gov/hipaa/for-professionals/special-topics/emergency-preparedness/notification-enforcement-discretion-telehealth/index.html>). Providers are encouraged to notify patients that these third-party applications potentially introduce privacy risks, and providers should enable all available encryption and privacy modes when using such applications.
6. Providers may now render services from non-traditional distant sites when clinically necessary. We encourage providers to follow HIPAA guidelines and to have access to patient medical records at their site to the greatest extent possible and act in the best interest of preserving member privacy when providing telehealth services.
7. Preventive services utilizing codes 99381-99397 (and appropriate POS and modifier) will be covered via telehealth during this state of emergency when a member is deemed low risk/healthy by the rendering provider and the provider determines, given the extenuating circumstances, that they can adequately assess the member through a virtual visit.

### **Telehealth Services for Behavioral Health**

For medical and outpatient behavioral telehealth visits, providers can utilize both interactive audio/video and audio-only.

For ABA Therapists and aides OSUHP will generally be covering:

Category	CPT Code	Description
Behavioral Health	97151	Adaptive behavior assessment by phys/qhp
Behavioral Health	97153	Adaptive behavior treatment by tech
Behavioral Health	97154	Group adaptive behavior treatment by tech
